**QCo Academy
Basic Bioinformatics,
17 Mar - 19 May
2022**

**10 Weeks
Every Thursday,
1pm - 5pm (Thailand Time)**

Suitable for beginners who have basic knowledge in bioscience or related domains. This is a foundation course to prepare participants who is interested to have a good grasp and overview about bioinformatics and its application in various disciplines such as precision medicine, precision agriculture, pathogen research and epidemiology, environmental study and many others. Participants will be exposed to both theory and hands on curriculum which has been curated over a decade of experience in running cutting edge data driven genomics projects. This course is pivotal for those serious about utilizing biological data to give them an edge in their professional careers.

8 Technical Modules

4-Hours per Module | Virtual Classroom | Playback Video | Quiz
